# Offer finance to your customers in 60 seconds...

Staying ahead of a competitive market can be a challenge for manufacturers.

Offering a tailored finance package can provide you with a competitive edge and assist you with increasing your sales.

And that's why we have created our **Supplier Partnership Programme**.

Designed to help both you **and** your customers, the programme allows you to offer finance at every point of sale - whether that's online, over the phone or in person - at any time.

Our online tool compares a wide panel of funders and will issue the customer with a Decision in Principle in 60 seconds.

We handle everything in-house too, from I.D. verification through to pay-out, meaning you get all the benefits of offering finance without disrupting your own business.

All you need to do is let your customers know that finance is available through us and we'll take care of everything else.
